

Aastra 700™ Endpoints

The A700 supports a wide range of endpoints to suit the needs of various users. These range from entry level, value-priced to high-end executive deskphones, soft clients and analog phones.

In addition to its capabilities of tight integration with mobile phones, the A700 offers wireless DECT phones for mobility within the office environment. And, as an open standard platform, the A700 supports any SIP-compliant third-party endpoint.

Aastra SIP Phones

A700 supports Aastra's complete line of 6700i series SIP phones. All Aastra SIP phones offer open-standard SIP, extended XML embedded browsers to support productivity enhancing applications, Aastra Hi-Q™ audio incorporating G.722 wideband sound, user friendly screens and simplified deployment.
